Comprehend

Group Name / C

The image displays a horizontal row of ten logo variations, each consisting of a small icon followed by the text 'logoipsum'. The variations are arranged in two rows: the top row contains five logos, and the bottom row contains five logos. The icons include a stylized 'i' shape, a square with a circle, a cross-like shape, a plus sign, a wavy line, and a circle with a dot.

The IBM GBS CPS Technology team was instrumental in providing the core Cloud Call Center Technology platform and IT support services to rapidly onboard/offboard & manage more than 650 IBM Supplier Agents on WFH BYOD laptops, deliver Agent Training using IBM Comprehend, and enable internal IBM and Agent collaboration required to provide Covid-19 Call Center operations for the State of Rhode Island.

THE STATE OF RHODE ISLAND.

Comprehend in 7 words

Aggregate

Organize information in one comprehensive library, with no discrimination of formal and informal resources for easy documentation, distribution, tracking, analyzing, and updating.

Integrate

Improve user experience through easy-to-use cross-platform workflows, seamlessly moving from our system to their popular work and social apps such as Trello, Slack, Salesforce, Webex, and more.

Cost-effective

Maximize investment in the most cost-effective solution for talent development in the e-learning and online events marketplace.

Scale

Develop with the prospect of expanding, applying design-thinking principles into every project to achieve breakthroughs for large enterprises. Entry Point Tier 1 capacity starts at 5,000 users.

Personalize

Enhance program effectiveness using secure and compliant in-depth insights from user data such as job role, learning history, work performance, needs, and skill gaps.

Mix-&-Match

Customize solutions for each client by providing add-on services options tailored to fit unique talent development needs and preferences.

Analyze

Collect essential, secure, and compliant data points through learner experience tracking across the learning management system and its integrated work and social applications.

IBM Seller Comprehend Kit

Comprehend Playbook

A short guide into the organization's strategies for IBM Sellers.

Author: Margaret Driscoll, Senior Manager

Last Updated: April 2021

	READ_ME_selecting_the_right_presentation_template_2020.pdf	
---	--	---

Which template should I use?

The following guidance will help you select the appropriate template for your situation.

PowerPoint Templates

[IBM_Master_Presentation_2020_V01_Plex.POTX](#)

- This template can be used with Mac OS or Windows OS.
- Slides will display in Plex, if the font is in the system and turned on.
- If Plex is not available, PowerPoint will make a substitute (usually Calibri, since that is normally the font used in the default PowerPoint template).
- [IBM_Master_Presentation_2020_V01_Plex_Embd.POTX](#)
- This template is primarily for use with Windows OS.
- When opened with Windows OS, the user can edit with the Plex font and create new slides.
- Only use the embedded POTX on a Windows OS when there is one of two end-cases:
 - A final presentation using the Plex typeface is needed, and it will be shown on a computer that doesn't have the Plex font installed (for example, a non-IBM Windows OS computer when traveling or sending presentations).
 - This template can be used with Mac OS, but all fonts are lost on save, making it the same as the Plex POTX without embedded fonts.
- [IBM_Master_Presentation_2020_V01_Arial.POTX](#)
- Safe for all machines, since Arial is a system font installed on all PCs and Macs.

Keynote Templates

[IBM_Master_Presentation_2020_V01_Plex.KEY](#)

- To display IBM Plex, the computer must have the font installed.

Comprehend Overview

Global Team

Delivery Team

Learning Consultants

Agile practitioners leading multidisciplinary teams

Our learning consultants will be your first point of contact during the project kickoff and brainstorming sessions, applying design thinking in fleshing out your custom solutions.

Designers

In coordination with our learning consultants, the Comprehend Design team will produce proof of concepts (POCs) and define the minimum viable products (MVP) in the initial phase of the project, ensuring everyone's vision is aligned.

User experience and design thinking experts

Developers

Outcome-oriented iteration-based professionals

Once the proposed solution is satisfactory for all stakeholders, Developers step in to produce the minimum viable product and execute further enhancements in iterative cycles.

System Administrators

System Administrators are present throughout the journey to provide responsive administrative support in web development, IT, and learning management, to ensure the smooth execution of our solutions.
